Focus on practice, not only on theory

At Advisera, our mission is to make complex frameworks easy to understand and simple to use. This is why we focus on ease of learning and on the practical aspects of what you learn.

This is why this course combines practical information with an interactive workshop, guided by an Advisera expert, to help you practice the concepts necessary for implementing ISO 14001.

How do the course & certification work?

What you'll learn

Part 1: ISO 14001 Foundations

- **Module 1 - Introduction to ISO 14001:** Understand the standard, the EMS, its requirements, benefits, and implementation.
- **Module 2 - The Planning Phase:** Learn how to plan an EMS, including its scope, objectives, roles, resources, and documentation.
- **Module 3 - Environmental Aspects, Compliance Obligations, Risks, and Opportunities:** Understand environmental aspects and impacts, compliance obligations, risks, opportunities, and planned actions.
- **Module 4 - Operations:** Learn about operational planning and control, externally provided processes, changes, and emergency preparedness.
- **Module 5 - The Check and Act Phases:** Learn how to monitor, evaluate compliance, audit, review, correct, and continually improve the EMS.

Part 2: Implementation

- **Module 6 - Getting the Project Approved**: Learn how to gain top-management support, present the project, and prepare proposals.
- **Module 7 - Prepare for the Implementation:** Define project scope, stages, roles, resources, communication, documentation, and the project plan.
- **Module 8 - Implementation of a Management System:** Learn how to execute project work, manage assignments and resources, introduce changes, and overcome resistance.
- **Module 9 - Monitor, Control, and Complete the Project:** Learn how to verify and report project status, communicate progress, conduct monitoring and control meetings, perform internal audits and management reviews, and complete project acceptance and implementation closure.
- **Module 10 - Taking the Organization for Certification:** Learn how to prepare the organization for certification, select a certification body, understand the certification process and Stage 1 and Stage 2 audits, organize audit logistics, prepare employees, understand what to expect from auditors, and manage post-audit activities.
- **Module 11 - Maintaining the Certification:** Learn how to maintain certification, improve and update the management system, ensure continued top-management leadership, prepare for surveillance audits, and manage activities between certification and the next surveillance audit.
